

## **Common Cold, Shoulder Pain, Leg Pain, Constipation, and Fibromyalgia:**

Presented by Charles Braverman, L.Ac.

**Symptom/Problem:** JR, a woman, developed a runny nose and sinus pressure but had not other cold symptoms.

**Treatment:** She received 2, 30-minute treatments

**Result:** Symptoms diminished for 1 day after first treatment. Second treatment was 2 days later and after 12 hours the patient was 80% better. After 48 hours patient was 100% better and symptoms did not return.

**Symptom/Problem:** Female with chronic shoulder/back pain for several years. Patient had tried physical therapy, massage, reiki which all failed.

**Treatment:** Patient received 2 FSM treatments for peripheral nerve and anxiety. 9 months later, patient received 6 more treatments all under 30 minutes and amps at 30.

**Result:** Patient reported mild adverse response and didn't continue treatment. After second treatment the patient reported 'it seems to feel better'. By treatment 5 patient recognized improvements and reports pain has dropped from 9/10 to 5/10.

**Symptom/Problem:** 57 year-old female has 30 years of low back pain, chronic constipation. Has a healthy diet and exercise regimen.

**Treatment:** Received treatments from 2007-2009 in which FSM successfully treated constipation.

**Result:** Patient went from 1 BM/week to 1BM/3-4 days. Patient had acute diarrhea that was treated for 1 week and it was resolved. Patients exact quote, "Eureka!". Now she gets a treatment every 6-8 weeks for maintenance.
